13-16 August, 2009 at *de Paasheuvel* near Vierhouten

Hacking At Random

- International technology & security conference. Four days of technology, ideological debates and hands-on tinkering.
- The atmosphere is friendly and relaxed, the average level of knowledge is high and outside of the official lectures the site is buzzing with energy, ideas and projects. The New York Times likened the 1997 edition to a “Woodstock for Hackers”.
